ABOUT THE COMPANY

CACI (Credit Agricole Creditor Insurance) is the Credit Agricole Assurances Group subsidiary specialising in creditor protection insurance (CPI). CACI is a major player in France and Europe, with around 30 partners in six countries.

Since its establishment in 1999, and move into the Credit Agricole Assurance Division in 2008, CACI has been extending its business in partnership with retail banking and specialised financial services companies. Today CACI offers a comprehensive range of products designed to meet the "Financial Protection" needs of its customers and partners.

The successful candidate will join a positive and vibrant company with a skilled, passionate team of people. CACI Dublin is proud to be named as a great place to work by Great Place to Work 2015, 2016, 2018, 2020, 2021 , 2022, 2023, 2024, 2025 and 2026. Our workplace is underpinned by a vibrant Culture and Values programme comprising of well-being, corporate social responsibility, HR best practice and fair funding for fun. We value our employees and quality of life at work is a priority for us. We understand that great workplaces are built through the day to day relationships that employees experience. At CACI, we work together to achieve our objectives with employees who give their best, develop in their careers and enjoy coming to work while achieving results together with their colleagues.

CRÉDIT AGRICOLE CREDITOR INSURANCE

DUTIES AND RESPONSIBILITIES

This role is responsible to centralise and reinforce CACI's existing monitoring metrics, complimenting with additional internal/external monitoring. In particular, the role holder is a leading contributor to portfolio monitoring and product oversight governance activities, as well as a key player in controls on emerging trends and respect of underwriting and risk limits.
This role helps CACI to proactively identify trends, catch and escalate potential issues at an early stage and leverage the information on its portfolios to arm senior decision makers with the information they need to make appropriate and informed decisions.

Reporting to the Pricing Manager, the successful candidate will:

- Liaise with all Actuarial teams to prepare/track/centralise all Actuarial and Underwriting risk metrics (e.g. GCB / GCCB, Loss Ratios, Portfolio Mix, etc)
- Produce and analyse quarterly Portfolio Monitoring Dashboard results.
- Produce annually key indicators for the Product Oversight Governance Dashboard and provide analysis and comments to ifentify appropriate actions for implementation in CACI and with the business distributors.
- Prepare and deliver communications to various audiences and fora, utilising PowerPoint presentations / Dashboards / Breakfast Meetings / FAQT meetings, etc. This will include presentations to all stakeholders including senior management and CACI Audit Committee and Board.
- Develop and test data controls to ensure UW limits and risk appetite limits are respected for all products.
- Identify and creatively use conventional and non-conventional data sources independently.
- Gather relevant data and metrics using SAS, Datamarts and various tools/sources, to analyze and interpret trends and provide commentary and insight to the various requests received from business partners.
- Identify areas of action/opportunity/escalation based on the various risk metrics.
- Represent the department in projects that require a multi-disciplinary approach to ensure that business concerns are integrated with profitability concerns when designing a solution.
- Recognize and implement areas of potential synergy within the Actuarial and Underwriting Department – e.g. aligning assumptions and techniques between Pricing / Modelling / Reserving.
- Contribute to Maintaining and updating the Pricing Tools.

Experience and Qualification:

Qualification:

- Holding FIA/FSAI qualification or equivalent Actuarial qualification (or expected in short term).

Experience:

- Minimum of 4 years professional experience.
- Experience with SAS/SQL and VBA Programming, a necessity.
- Experience working with Microsoft packages, particularly Excel and Powerpoint, a necessity.
- Experience analyzing data, extracting trends, summarizing and communicating to senior stakeholders a necessity.
- Experience managing projects to completion managing various stakeholders and inputs a necessity.
- Experience with other software packages (R / Python) and data visualisation tools (Qlikview / PowerBI / Tableau) and techniques an advantage.
- Experience with task automation / machine learning / AI techniques an advantage.

Skills:

- English fluency a necessity.
- French language an advantage.
- Ability to understand and meet deadlines.
- Stakeholder management and influencing skills.
- Strong communication skills, critical thinking, organized and punctual.
- Interest in Data Science and emerging industry trends an advantage.
