

## Job Spec

Position: Full Stack Developer (C#)

Department: IT / Software Engineering

Location: Remote but Dublin preferred

Employment Type: Full-time

Start Date: May TBD

---

### About the Role

We are pleased to offer you the position of Full Stack Developer (C#). In this role, you will design, develop, and maintain modern, scalable software solutions across the full technology stack. You will work closely with product owners, architects, and fellow engineers to deliver high-quality applications that support business objectives and long-term maintainability.

---

### Key Responsibilities

- Design, develop, test, and maintain full-stack applications using C# and .NET
  - Build and maintain backend services and RESTful APIs
  - Develop responsive and maintainable frontend components (E.g. Blazor)
  - Collaborate with product owners and stakeholders to refine requirements and translate them into technical solutions
  - Ensure high code quality through reviews, testing, and adherence to best practices
  - Contribute to architectural decisions and continuous improvement initiatives
  - Actively participate in agile development processes (Scrum ceremonies, sprint planning, reviews)
- 

### Required Qualifications & Skills

- Proven computer science education (e.g. degree in Computer Science, Software Engineering, or equivalent practical experience)
- Strong understanding of object-oriented design and development principles
- Experience applying clean architecture principles and writing maintainable, testable code

- Strong experience with C# and .NET (.NET Core / .NET 6+)
- Experience with modern frontend frameworks (E.g. Blazor)
- Solid understanding of SQL and relational databases
- Experience with REST APIs, authentication, and authorization
- Familiarity with Git, CI/CD pipelines, and DevOps practices
- Experience working in Agile / Scrum environments
- Strong analytical and problem-solving skills
- Proficient English (spoken and written)
